Commodore 16

The World's
Learning
Machine

The First Step

. . . into the world of computing is a Commodore computer. The new Commodore 16 is a powerful, 16K tool for anyone, any age to edge into computer literacy. Complemented with a full range of peripherals and software, the Commodore 16 is your perfect learning machine.

1802 Color Monitor

The new Commodore 1802 is a quality, high resolution color monitor. For superior quality video output from your new Commodore computer or any standard video recorder, the Commodore 1802 is the perfect choice. Completely compatible with all Commodore equipment.

1531 Datassette

The Commodore 1531 datassette drive unit is the perfect storage device for your first computer system. Compatible with the Commodore 16, it runs standard audio cassette tapes, digital tapes are not necessary. Play, record and save your programs with the Commodore 1531 datassette unit.

MPS 803 Printer

The Commodore MPS 803 is a dot matrix printer which adds versatility to your Commodore computer. It prints alphabetic, numeric and all graphic characters. Combined with the 1531 datassette unit and your Commodore 16, it completes a perfect system for the uninitiated computerist. Available with optional tractor unit.

Commodore 16 Software

The Commodore 16 comes complete with a tutorial cartridge to familiarize you with the functions and capabilities of the Commodore 16's professional style keyboard. For continuing education and enjoyment Commodore offers a full range of programs including the following:
