COMMODORE 1802 ™

The 1802 is a quality, high-resolution monitor that maximizes the video capabilities of Commodore computers. A 40-column color mode (16 colors) and an 80-column monochrome mode increases your graphic versatility. And the 1802 is also fully compatible with VCR's and television tuners. A built-in audio amplifier and speaker lets your computing speak for itself.

1802 COLOR MONITOR
