## DIGITAL CLASSIFIED SOFTWARE

**PRODUCT NAME: SUSPENDED™, Version 8.0**

**SPD A2.90.01**

DIGITAL distributes this software product under license from Infocom, Incorporated.

### **DESCRIPTION:**

SUSPENDED™ is a Prose Entertainment Package developed using an Artificial Intelligence Language called INTERLOGIC™. INTERLOGIC allows the creation of the entertainment software in such a way that the user carries on a free format, textural conversation with the software. The user is able to interact with the program using complete sentences rather than two-word commands with greater vocabulary and more command options.

SUSPENDED places the user in a situation of awakening from a frozen state of suspension on a planet in a future time. The planet is in total chaos which threatens to destroy life support systems. The user must bring conditions under control by acting through a robot crew, each of whom offers a distinctly different view of the world. The user's success if dealing with this catastrophe will determine his fate.

No hints, clues or any additional information on the progress of this game will be provided by DIGITAL.
