

Monkey Puzzle

You have to change the size and shape of the medicine leaf packages so they will fit properly into their bamboo boxes.

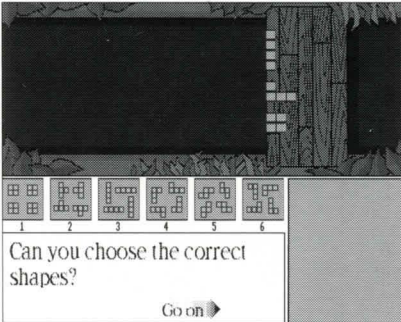

Letters are used to show the different measurements of the parcels.

Use the mouse to choose which measurement to change, and then to select the new length.

You may need to change the length of both sides before the package will fit.

When more than one package is shown at the right of the screen you will see that they are different colours and have different letters to show their measurements. Make sure that the letters you click on match up with the colour of the package being dropped into the box.

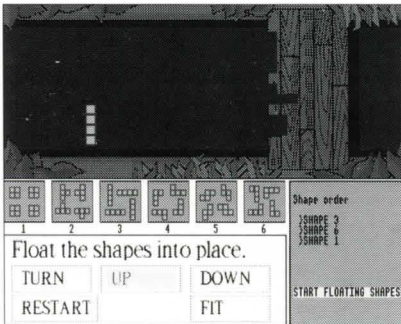

Garden Bridges

You must fill in the spaces in the broken garden bridges.

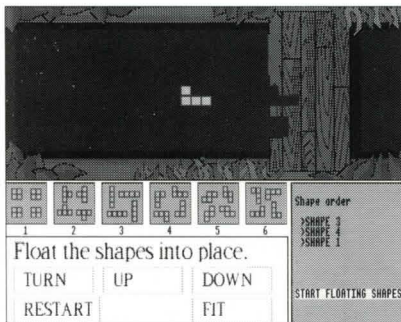

Use the mouse to select the shapes you need.

You must be careful to choose them in the correct order to fill the gaps in the bridge.

When you click on **START FLOATING SHAPES** they will float downstream from the left hand side of the screen.

As the shapes float towards the bridge, you must use the mouse to **TURN** them, or move them **UP** or **DOWN** so they float into the correct place.

If you have made a mistake, you can **RESTART**.

If you are happy that you have everything right, you can float the shape in quicker by clicking on **FIT**.
