

## Planet of Lust

### Hints

These hints are written for those intrepid voyagers who have somehow become 'lust' in space. Scenes from the game are described in varying detail. In some cases, specific solutions to the scene are offered. At other times, misleading or totally irrelevant information is offered. However, using these hints and saving the game position at appropriate times, the adventurer should be able to rapidly solve Planet of Lust.

#### The Ship's Control Panel -

Before you do anything, sit down in the Captain's chair. Sandie (the ship's computer) can tell you about possible destinations. Sandie has lots of hints. It is worthwhile to consult her frequently. If you want to blast off, check around the control panel for the proper device.

#### Control Room Door -

A device is active. Check it out if you really need to know.

#### Main Passageway -

Because you are so far out in space, the ship's radio can only pick up one station. The DJ is rather obsessed with a Spurious T. Bach composition.

#### The Cargo Hold -

Captain Brad is not above earning a few extra bucks by transporting illegal substances. While a powerful aphrodesiac, Orgasium is an extremely hazardous material. If you must handle it, use caution.

#### Captain's Cabin -

Here you can receive phone calls, take a nap or get a drink of water. You may need water later in the game.

#### Main Air-Lock -

The air-lock is opened by pushing a button. However, before you push that button, are you absolutely certain as to what is out there?

#### Erotica -

A great place to vacation! Just look around you. A good place to rest between adventures. Notice the effect the surroundings have on Brad. Now you know where the term "Big Thruster" arose!

• • Air-Lock of Space Station -

Overcome by the green gas, you are rather helpless here!

Prison Cell -

If you become trapped here, your situation is hopeless. Just ask Sandie! If you are alone and stuck in the prison cell, it is time to start the game over.

Space Station Control Room -

Think fast! Dr. Dildo has a gun pointed at you! Is he swishy? If the Princess is there, Dr. Dildo is a bit of a voyeur. Do you grab the gun, grab the lever or just slug it out with Dildo?

Princess Orgasma -

She is thirsty. She doesn't have a lot of time to fool around. Did you bring her anything to eat or drink?

Love Scene with Princess -

Afterwards, you could fool around some more or maybe talk to her about establishing a more permanent relationship.

Space Station Hallways -

Just follow the leader.

Alongside Big Thruster -

You can go up into the space ship or walk in any direction. This is a good place to save your position.

The Jungle -

Although your destinations may be only a couple of moves away, you should make a map. It is easy to get lost and wander endlessly in the jungle. If you need food, are you desperate enough to try to catch a snake?

Stone Statue -

The entrance is as unusual as the sculpture. Do we have to push a button or do we just go right in?

Exotic Fruit Trees -

Are the Love Apples safe to touch or eat? Can you eat just one? Should you take one along? Who knows?

### High Priestess of Desire -

You don't have to be an Einstein to figure out that this lady wants to make love to you. Is this because she just wants your body or is she trying to protect something on the altar? A little foreplay isn't bad. Use your hand if you want to fool around. If you decide to make love, are you prepared? Are you supposed to give her something?

### Love Scene With Priestess -

Is once enough? Should you fool around a little more? Maybe she is tired of one night stands and wants to talk about a deeper commitment.

### The Pool of Everlasting Passion -

Should you take a bath, go swimming or get a drink. Got anything to carry water?

### The Cavern -

When you first enter the cavern, this is a good place to save your position. Again, you will need to make a map. Although your destinations may only be a couple of moves away, it is very easy to become hopelessly lost in the cavern. Will a torch help?

### Technical

If you need technical assistance, you may call for technical support at 215-683-5699 or write to Free Spirit Software, P.O. Box 128, Kutztown, PA 19530.

We hope you have enjoyed Planet of Lust. Bride of the Robot, another Captain Brad Stallion adventure, is coming soon! Because Bride of the Robot will be so feature-packed, Amiga owners should upgrade now to 1 meg. of memory.
