# QUEST

Sharp Approved Software

## **QUEST**

A real adventure game! You are in a 130 room castle and your hazardous mission is to find and take the four Sectors of the eyes of Morpheus to the eternal fires of hell. If you can throw them into the fires then they will be extinguished and the crevasse to the long lost treasure of Borgan may be bridged. The program data may be saved on tape for continuation of this treacherous adventure game at a later time.

QUEST is an addictive and consuming mission which will test your wits to the full.

© J. Wolfencroft 1983

**LOADING THE PROGRAM:** To play Quest first load Sharp Basic. Then load Quest, to start type in "Run".

**CARE OF THE PROGRAM:** When not in use keep the tape in the case. In case of difficulty when loading please check (i) the tape heads have recently been cleaned and (ii) the settings of the controls of the tape recorder. Should a checksum error occur either the tape recorder or tape is faulty.
