RAIDERS OF THE LOST TOMB

Written by Peter Clark

It appears that ancient Egyptian artefacts have been found in antique shops in London which far from being sold to the highest bidder should be preserved in museums. High level investigations by Interpol point to the fact that a previously undiscovered tomb may have been opened in the Valley of the Kings and is being stripped of its valuables.

This text adventure game understands all the standard adventure commands i.e. North, East, South, West, Up and Down which can be abbreviated to N, S, E, W, U, D. Some useful verbs are EXAMINE, LOOK, GET, DROP, GIVE, UNLOCK and many more. Other important commands are INVENTORY or (I) will give you a list of what you are carrying , SAVE will save the game position to tape and LOAD will restore a previously saved position from tape. RAMSAVE (RS) will save the game position to memory and RAMLOAD (RL) will restore a position from memory.
