To load **Tombs of Xeiops** press SHIFT/RUN STOP.

Welcome to the world of Adventure.

The computer will provide your senses and movement, to enable you to attempt to retrieve all the treasures within the tombs.

Instructions:- You can usually use one or two words to instruct the computer. For example:- Get Lamp, Drop Sword, Examine Door . . . or Go East, Go West, etc., (these can be abbreviated to E, W, etc.) You might like to try Inventory, or Help.

Abbreviations often work, also remember to think of synonyms if at first you don't succeed (for example, Break might be a synonym for Smash, Up for Climb, etc.). In this adventure you might like to try Climb Tree, or Kill Cobra, though we will not guarantee that they will do you any good.

If you wish to leave the game and come back to it at a later date, insert a blank cassette, type in the instruction "SAVE PROG" (press return). Your current position in the game will then be saved, for you to reload and resume where you left off, at any time in the future.

To reload a saved game, load in **"Tombs of Xeiops"** as normal, then type "LOAD PROG" (press return).
