Mission X

ST.BRIDES

The Secret Of St.Brides
The Snow Queen

PRECISION SOFTWARE

The Extricator
The Energem Enigma

SPECTRUM EMULATIONS

Please note that whilst the vast majority of the titles for the AMIGA, ATARI and PC formats are supplied in the shape of a 'Spectrum Emulation' they are still 100% playable as you also receive a FREE emulator with EVERY game. This emulator enables you to play the games on your own machine as though it were a SPECTRUM and provides full access to all the coding of the original SPECTRUM game. However there are one or two titles that require the use of a 'saved' position at the end of one part in order to allow you to play the next part and in these cases it will be necessary to register with the supplier of the emulator in order to receive a version of it that will enable you to do just that. See the 'docs' files for further information. This does NOT apply to the AMIGA emulations, only the ATARI and PC.

Where a game requires the use of a password for entrance to the next part then the version of the emulator that is supplied with ALL games will be sufficient to carry this out.

Also note that the ATARI emulator does not allow you to utilise the in-built 'save' and 'load' routines - you will have to resort to saving your game position by means of a 'snapshot' of your current game. See the 'docs' on the disk for more information concerning this fact.

COMPILATION DISKS AND TAPES

A full list of such items is not supplied at this time, however should you wish further details of the various compilations available for your machine then just drop a line to the usual address and ask for more information. Please state which machine the compilations are required for.

HINT-SHEETS

Hints are available for about 90% of the titles listed and are provided for the princely sum of only 25p each, regardless of their size or format. Just send your requirements and a large stamped S.A.E. to the usual address - not forgetting the correct remittance.

ADVENTURE
