getting started

switch the computer system on, them follow the instructions on the disc label. The disc drive will whire, and the program should start. If, after following all the instructions, you still can't get the program to start, or you are in any way not satisfied with its performance, return it to us in its original packaging, and we'll test it and replace if necessary. Refer to the booklet 'How to Play Adventure Games' for tips one hand to use the game itself.

SOME QUESTIONS AMSWERED:

I waited to load a game I saved a week ago, but I couldn't remarker what I called it. How do I find out?

The only way to research names of sawad games is to check them out before you start a game, le from the A> prompt, Use the DIR command, as described in your system manual under researce 'DIR' our 'DIRCTORY'.

it musing a double disc system. Can I have the adventure disc in drive A. and my data disc in drive B2

We recommend this, but remember that the data disc must be of the correct type and correctly formatted for that drive - see your manual for details.

To save to dailve B at the ': ' pagent, type

SAVE (REPERM)

The computer will respond with:

Please insert saved game disc. Save

Put your "data' disc in drive B, then type:

B:gamename (RETURN)

where 'gamename' is the name that you are using for your saved position.

To get back to that saved position at a a later gate type RESTORE (RETURN) and follow the on-screen instructions, using B:gamename at the appropriate time.

I tried to save a game, but got a 'Disc full' message.

This means what it says: the disc is full. You have two choices: either put

ERA facility, from the A> prompt, to erase one or more of your old files (see your system manual for details.) - for first a Tib well I

I tried to save my position, but it won't let me!

If the name that you're typing in is too long (maximum 8 characters) the computer will just keep saying:

until you use a name it likes. If you've of med the write-protect hole in the 1 30 5% disc, you will get the message:

The grant Tobach P

de to the ten ton ton

***** from sobbing?

paied blovs I of wer at

C学者者主案名 表示我在并 · 入户 20 now in I survive to the 15

Abort, Retry, Ignore?

If write-protect is the problem, remove the disc, and close the hole. Put the disc back in the drive and type R (RETURN). If write-protect isn't the problem, put a different (correctly formatted) disc in the drive, and type R <RETURN>.

I want to back up the disc. Can I do this?

The disc is copy protected. Attempts to copy it may result in damage to the code. Replacement or back-up discs are available from TOPOLOGIKA for a nominal MAIN TO THE WALL OF THE PARTY O

When I try to LOAD or RESTORE a saved position, I get the message:

The program can't find a file of that name on the disc. You may have just mis-typed the name (in which case just type it again). You may be trying to load a game that you think you've saved, which, in fact, you didn't! Pinally, you may be using drive B with a correctly formatted saved game disc, but omitting the drive reference from the 'gamename' (see above.) adi ne ob t et doni ci
