ULTRABOTS™

From the designers of Comanche™: Maximum Overkill comes 60 tons of robotic mass destruction in a world of leading edge 3-D ray-traced graphics and digitized special effects. First contact turns to first blood as an alien craft enters Earth's orbit and releases a deadly cargo of mammoth robotic machines. As they begin their systematic destruction of mankind, only one hope remains: a fleet of retro-fitted Ultrabots under your control. This astonishing game, rendered in feature film-quality 3-D modelled animation, skillfully blends a futuristic robot theme with simulated cockpit controls and military arcade action to create an all-out explosive experience!

- Ray-traced, 3-D modelled animation—feature film technology on your PC!
- First person robot-to-robot combat! Choose from 3 'bot models: the Scout, the Scorpion, and the Humanoid Warrior.
- Utilize a multitude of offensive and defensive weapons, from cloaking devices and mines to plasma cannons.
- Computer generated maps and visual displays, including thermal sights spot the enemy at night.

SSN-21 SEAWOLF™

The sequel to the smash hit 688 Attack Sub™, SSN-21 Seawolf is the most advanced submarine simulation EVER! With revolutionary 16 bit digital true STEREO sound, this product will overwhelm you with over 100 distinct sound effects ranging from the high pitched whine of torpedoes to underwater explosions to sonar signatures for each ship and submarine class in the game. A full musical score, which maximizes the potential of the Roland LAPC and Sound Canvas and ordinary MIDI boards, sets a high-water mark that other sims have yet to match. With stunning VGA graphics, video-digitized special effects, sophisticated AI, and modem/network play, SSN-21 Seawolf represents a major breakthrough in simulation technology.

- Vivid, realistic periscope views with different water effects, skies and weather.
- 3-D contour views for underwater navigation.
- Real motion video of crew members and video news reports with digitized speech.
- 33 missions in one campaign each with a random set up option.
- 65+ ships, subs, and aircraft, each with its own digitized image and sound signature.

WING COMMANDER® ACADEMY

As a student at the TCSN Academy, you custom-design and fly unique combat, rescue, and search and retrieval missions from the CyberSchool's holographic simulator. In the design phase, you can choose to protect capital ships, navigate asteroid and mine fields, retrieve ejected pilots or data capsules or fly missions against a wide variety of enemy fighters. The game features a dynamic musical score, improved graphics rendering, a dazzling array of customizing options and heart-stopping dogfight challenges.

- Experience combat in the all-new Confederation *Wraith* or Kilrathi *Jrathek* fighters.
- Select a cybernet wingman, from a frightened cadet to a hotshot veteran.
- Sharpen your combat skills as you compete for high-point honors.
- Engage a dogfighting marathon in the "Gauntlet," where wave after wave of Kilrathi fighters test your mettle.

ARE YOU SHARP ENOUGH FOR THE CUTTING EDGE?

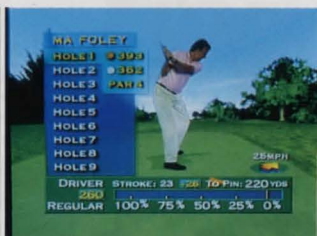

3DO technology is going to revolutionize the way you play games. With its unique 24-bit color graphics, CD-quality sound and Hollywood special effects, the 3DO system delivers game play so real it's *unreal*.

Step into the cockpit of your own spaceship and explore the far-flung reaches of the galaxy—you'll swear you're really flying by Mars. Master John Madden's playbook and blitz your way to the Superbowl—you'll feel your cleats biting into the turf. Climb on your motorcycle and speed through the streets of San Francisco—you'll feel the wind in your face. If you've ever dreamed it, EA software and the 3DO system can make it real!

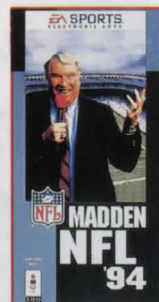

24-bit true color photographic images, like this NASA Earth photo, can be combined with high quality computer art to provide unparalleled realism in a gaming environment.

Video footage, like this pro golfer on a real green, can be fully integrated into product designs, providing full-screen, full-color video. You want to learn the lies from REAL people; with the 3DO system, you can!

Cinematic Software Tools™ enable creation of Hollywood-style graphics not possible on a home system until now. Stunning effects such as light-sourcing, texture mapping, warping, and translucence provide thrilling special effects that heighten the gameplay experience.

JOHN MADDEN FOOTBALL™

The best-selling football videogame ever has an all-new design for the 3DO system. Fully digitized player animations, 3-D rendered field and stadium art, and CD-quality digitized sound bring out the best of the 3DO system.

PETER PAN: A STORY PAINTING™ ADVENTURE

Let your child's imagination soar with Peter, Hook, Tinkerbell and the whole Neverland gang in this breakthrough interactive cartoon. Players ages 5 to 9 become the "hands of the animator" as they unite with the Painbox Pals™, a set of animated point tools, to actually affect events in this revolutionary 3DO rendition of the classic tale.

SUPER WING COMMANDER

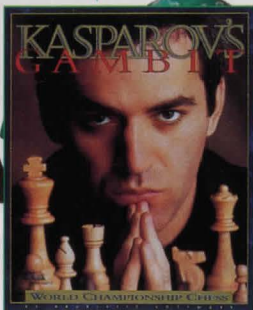

Blast into the middle of the most intense starship action you've experienced outside of a movie theater in Super Wing Commander, but now, you're the star. The science fiction action adventure that set the benchmark in PC gaming comes alive with the improved 3-D graphics, blistering speed and sound capabilities on the 3DO system. Featuring additional missions, new cinematics and enhanced music and sound effects to take full advantage of this exciting new platform.

Garry Kasparov is an international celebrity, renowned almost as much for his political acumen as for his mastery of chess. Born in Baku, but now living in Moscow, Kasparov became the youngest chess champion in 1985 when he won the world title at age 22. Recently, in search of new chess challenges, he has taken on and defeated entire national teams in simultaneous play, as well as a supercomputer. One respected expert on the game who analyzed the winning strategies of the finest players in history has proclaimed Mr. Kasparov "the greatest chess Grandmaster of all time."

REAL DEAL POKER™
