THE CRYSTAL FROG

The Crystal Frog is a traditional adventure program for the 48K Sinclair Spectrum and the CBM 64. You play the role of the main character, with the computer acting as your eyes and ears. The object of the game is to find the fabulously valuable Crystal Frog and return with it intact. It will not be easy! You will start the game in the countryside from where you must explore in order to complete your quest. Be warned, however, that things are not always what they seem
to be.

During the course of the adventure you will find various objects which may or may not be of use to you, either immediately or at some later location. To obtain a score of 100% it will be necessary for you to visit all locations and solve all the puzzles.

The adventure understands lots of words, which you must discover. 'NORTH', 'SOUTH', 'EAST', 'WEST', 'GET', 'INVENTORY', 'REDESCRIBE' are just a few.

Since the game may take many weeks to solve you may save the game at any point by simply using the inbuilt save facility. Simply enter 'SAVE' at the point you wish to continue from and your current position will be saved to tape.

You may load a previously saved game at any time by simply typing 'LOAD' and you can then restart from your previously
saved position.
