## Troubleshooting Tips

If you have any questions about *Elvira: Mistress of the Dark* and you can't find the answers in the manual, our Customer Support folks can help. You can call us at 408-296-8400 between 9 a.m. and 5 p.m. Pacific Time, or write to Accolade Customer Support, 550 S. Winchester Blvd., San Jose, CA 95128, or leave a message for us on CompuServe (type **GO GAMPUB** and leave a message for Accolade 76004,2132).

**Please be sitting in front of your computer when you call, and have the following information handy:** Your computer's brand and model (XT, AT, PS/2, etc.), the amount of memory (RAM), what peripherals are attached, the type of graphics card and monitor, what disk size you use (5 1/4", 3 1/2"), the contents of your **CONFIG.SYS** and **AUTOEXEC.BAT** files.

Please read the following section before calling us, as it might solve any problems you have.

### If Your Game Doesn't Load Properly:

First, please re-read the manual and try the instructions again step by step. One misstep can blow the whole thing. If it still doesn't load, check your **Autoexec.bat** file for memory resident utility programs (menu programs such as *Dir+* and *PC Shell*; utilities such as *Sidekick* and *PCTools*; disk caching programs such as *PC Cache* and *Lightning*) and remove them. Our games are greedy and don't like to share memory with these products.

Also: check your **Config.sys** file for device drivers which could cause problems — such as an expanded memory driver for RAM disks.

To find these DOS files, type **CD C:\** at the **C>** prompt. Then type either **TYPE AUTOEXEC.BAT** or **TYPE CONFIG.SYS** — if the files are there, the info will scroll onto the screen. If you suspect that a program listed there is causing problems, try one of these solutions:

# ELVIRA

- Reboot your system with a "clean" DOS disk from the **A>** prompt. A clean DOS disk is a bootable disk with no **Autoexec.bat** or **Config.sys** files (see your DOS manual for details). Then proceed with normal game instructions.
- Temporarily rename these two files (refer to your DOS manual for specifics), and reboot your system.

## If You Get Garbled Graphics (or none at all):

If you load the program and nothing appears on your screen (or what does appear, seems garbled), you may not have specified the proper graphics type for your system.

- Check your hardware manual to make sure your computer can run this game.
- Re-run the SETUP program, and make sure you've specified the correct graphics option for your computer.

## If You Have a Supported Sound Board, But Get No Sound From It:

- Re-run the SETUP program and make sure you've selected the appropriate sound device.
- Make sure your sound board is properly seated in its slot.
