FRANTIC FREDDIE

Frantic Freddie - the game with a sense of humour! Features . . .

- Unbelievable music soundtrack • 32K of machine code program
- New characters and screen formats on every level
- Cute bonus characters
- Wacky messages
- 16 different levels
- 10 full length musical scores
- 2 different intermission cartoons
- Saves top ten scores with initials

Freddie is a telephone engineer who has accidentally come across a secret magical phone network. Pots of gold are sitting on the wires, and Freddie is so greedy that he has to get them all. Unfortunately, the gold is guarded by the dreaded Greeblies. The Greeblies may look cute - but they are ruthlessly efficient at disposing of anyone who comes to steal their gold!

Plug your joystick into Port 2. Use the stick to move Freddie sideways and up and down. When Freddie meets a telegraph pole he must go up or down it. The Greeblies can go through it, but Freddie can't! When he has grabbed all the pots of gold, the game advances to the next level. You score 10 points for every pot of gold, increasing by 10 points each new level. 100 points are scored for bonus characters, increasing by 100 points each new level.

It may help you to know that the Red Greebly tracks you up and down, searching for the floor level that Freddie is on. The Blue Greebly tracks Freddie sideways, and the Yellow Greebly has a random up and down movement.

High scores are entered, starting with the leftmost initial, by moving the joystick Up or Down until the right letter is displayed. Then move the stick to the Right to go onto the next initial, or to the Left to go back to a previous initial. When the initials are entered correctly, press the FIRE button to enter the score into memory.

To load the program, press SHIFT and RUN/STOP at the same time. Frantic Freddie incorporates a fast loading routine, so you shouldn't have to wait long for it to load. When it has loaded, the program will auto-run. Press the FIRE button to start the game.
