Loading Instructions:

To run the program:

1. If your BBC is fitted with a Disc or Econet Interface, return to the cassette filing system by typing:
*TAPE (press the Return Key)
PAGE=&E00 (press the Return Key)
2. CHAIN"" (press the Return Key)

The program should then load into your computer and automatically run.

The Game:

Many intrepid explorers have ventured into the labyrinths surrounding the ancient town of LaCoshe in a remote area of Greece but few have returned. The ones that have survived tell tales of marvellous treasures guarded by terrible monsters.

WANTED — experienced adventurers to retrieve the hidden treasure in the LaCoshe labyrinths.

To explore this fantasy world, you must tell the computer what to do using 'English-like' phrases. Eg. WEST, TAKE, DROP, etc. You must use you imagination, you could be surprised at what the computer will understand.

The object is to collect as much treasure as possible. Extra points can be gained by visiting different rooms (there are over 100 of them). Locations to visit include the strongroom and vault, Hades, the control room and the Grotto.

If you have problems: When the program is loading into the computer (after you have entered *RUN, *LOAD or CHAIN"") the message 'Searching' should appear on the screen followed by 'Loading' and the program name when the program is found. If the program name appears without the 'Loading' message or messages like 'Data?' 'Block?' or 'Header?' appear, rewind the tape a short way and alter the volume level on the cassette recorder. If, after repeating this several times, the 'Loading' message still does not appear, try the second copy of the program on the cassette.

If, after trying the above, you are still unsuccessful or the program does not load very reliably, then return the cassette to us stating when and where you bought it, details about you computer (memory size, Operating System, any interfaces fitted, etc) and which cassette recorder you have been using. These latter questions are important due to the frequent updating of the computer's specification.

WARNING: All rights reserved. Unauthorised copying, hiring, lending or public performance of this software tape strictly prohibited.
