## AND THE CAVES OF MR. SEUDO™ Ages 5-12

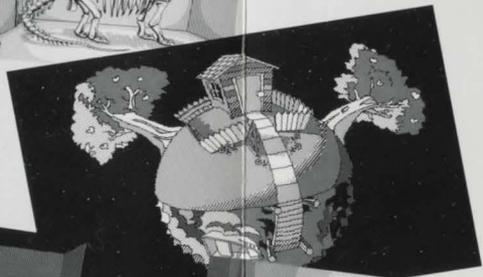

"Spark children's curiosity about the world by letting them explore these marvelous caves built by my best friend, Professor Spelunx, and me, Mr. Seudo.

"In the tower observatory, they'll learn about astronomy as they use the Planetary Seudo Scope to watch the planets spin. In the Lizard Terrarium, they'll discover the concept of cause-and-effect in an ecosystem. They'll also learn—as I did—how to keep a lizard happy!

"To exercise their creativity, they can draw with the amazing Desk Drawer. Or just have fun as they play the wacky game of Yodel Toasters.

"They can even add their own Warp Rooms and rearrange all our caves and tunnels. Just don't be surprised if the more they explore, the more curious they become!"

—Mr. Seudo

The 7th Guest opened players' eyes to the future of CD-ROM. Myst leapfrogs Trilobyte's hit game and takes CD-ROM to the edge of virtual reality."  
—Arnie Katz, Electronic Games
