

ADDENDUM

GUN FIGHT CONTROLS

Several areas in the game have gun battles. These can occur at any time. The controls for the fight scenes are as follows:

Walk Forward
Crouch
Fire
Run Away

Joystick Right
Joystick Down
Joystick Button
"/" key

The object is to cross to the other side of the screen.

BOUNTY HUNTING

You can acquire extra cash and ammunition by flying to BOUNTY areas and fighting. Bounty areas are places where no law exists and where gangs of thieves and murderers control the streets. The government has placed a bounty on the gang members in an attempt to bring the problem under control. Bounty areas have solid black landing pads but do not have NC addresses. The "Bad Guys" you will encounter in these areas are more formidable opponents than you'll meet during the normal course of your investigation.

The following are coordinates of Bounty Hunting pads. Go to the NAV Computer and use the Joystick to move the red cross-hair to the approximate coordinates, then press the Joystick Button. The NAV Computer will now be programmed to the location of the cross-hair. **Note: Each pad can only be used once.**

By using the NAV Computers "ZOOM" feature (+ and - keys), you can change the amount that the cursor moves. This will aid you in getting to the approximate area of the fight pads. Exact coordinates are not necessary, but you must be within 100' of the pad coordinate to enter the Bounty zone.
