monolith satisfies your craving for the best in PC gaming. Whether you're itching to demolish everything in sight with a heavily armed mecha, or if your mood calls for pummeling an imposing dragon with a magical meteor shower, *Monolith* has the games you want to play.

Forget what you think you know about giant robots. Pilot ultra-powerful mecha that run, jump, duck, strafe, swim, stomp on enemy personnel, wield gigantic, super-destructive weapons, and transform into hover tanks in 800 milliseconds flat. Remember – Bigger is Better.

Want to blow off some steam?

May we suggest blowing up a zombie? Blood started it all with its blend of not-so-nice monsters, powerful and plentiful

weapons, undeniably awesome multiplayer action, and enough macabre humor to get a mummy cackling. Blood 2: The Chosen will improve upon the realm of Blood in more terrifying ways than you can imagine, combining a cutting edge 3D game engine, horrifyingly nightmarish creatures from another dimension, and more blood than Blood.

Join forces with Captain Claw,

the greatest cat pirate ever to challenge the Cocker Spaniard Armada! Help him defeat his enemies in this action-packed quest for the Amulet of Nine Lives. An arcade-style action/adventure game, Claw combines hand-drawn,

Disney-style animation, tons of bad guys and levels, plus multiplayer capabilities.
