

Colouring shapes

You must colour the following shapes using only four colours. Touching shapes must not be the same colour.

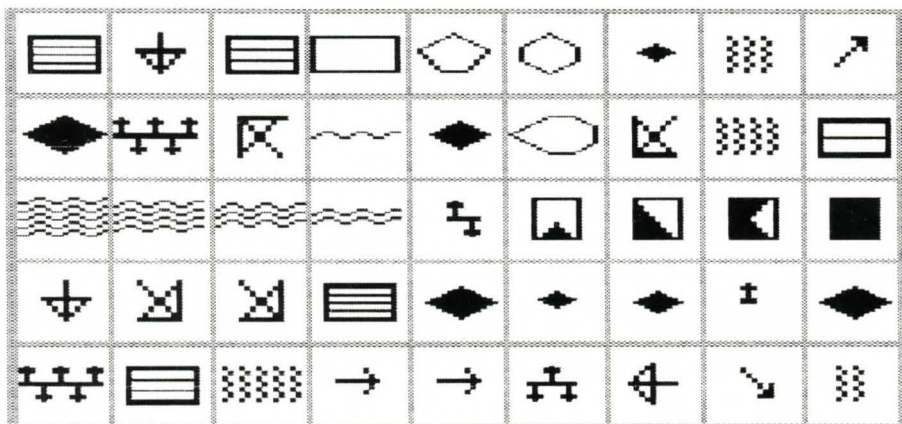

More ideas:-

- 1 Design your own collection of shapes for a friend to colour.
- 2 Design a collection of shapes that can be coloured using only three colours.

Sequence Maze

Look at the maze of shapes on this card. Try to find the three sequence codes that will take you from the left hand to the right hand edge of the mazes.

More ideas:-

- 1 Design your own sequences. Copy them out again and leave out the end shape in your sequences. Challenge a friend to complete your sequences.
- 2 Design your own maze on grid paper. Perhaps you can think of a single long sequence that will take you from one side of the maze to the other.
