THE QUEST
ZX SPECTRUM 48K

"THE QUEST"

In this game there are two modes: the general mode and the movement mode.

A. GENERAL MODE

There are four commands in this mode.

1. Move on. This will transfer you to movement mode.
2. Elixir. An elixir may be taken to boost one of your six ratings (food, drink, strength, stamina, intelligence and dexterity) to 100 points. If any of these drop to zero, you will die.
3. Update. This will give you a report on the status of the game.
4. Exit. This command will give you four options.
 - i) Start a new game
 - ii) Save the present game on tape (ensure you are not recording over program)
 - iii) Load in a new game from tape
 - iv) Quit the program

B. MOVEMENT MODE

You either move on into the chamber of your choice or, if you have a lamp, you can examine the chamber before entering it.

THE OBJECT OF THE GAME

You must find the Grail, which is hidden in one of the chambers.

Finally a clue:- "The gargoyle knows!"

Instructions inside cover.
