SUNKEN CITY

DRAGON 32

SLIK
OFTWARE

THE
STORY SO FAR...

The time — 1850
The place — The Professor's laboratory
Professor:

"I am Professor Ells and I want you, my trusty assistant, to do a great service. We have worked long and hard on my time machine, but we still need one more item to enable us to travel into the future. The Wheel of Time.

"According to legend the wheel of time was once owned by a vicious tribe of Myrians who used the Wheel to disrupt the world and to gain power for themselves.

"But the Gods heard of this and they sent a mighty flood to destroy the magnificent city which the Myrians had built to house the Wheel.

"It is said that every Myrian was drowned and that the Wheel of Time was never seen again.

"Find the Sunken City and bring me the Wheel! That is your task. But first I must send you back into the past, to a time when people may still know of the whereabouts of the Sunken City. So go now..."

INSTRUCTIONS
FOR LOADING

1. Attach the leads to the cassette recorder as described in the manual

2. Insert cassette and rewind if necessary. Both sides are the same

3. Type CLOAD and press ENTER

4. Press PLAY button on recorder

5. When OK appears, type RUN

PROBLEMS

If an I/O error occurs, rewind the cassette and adjust your volume control. Check leads (and batteries, if any). Try loading again.

If thick white vertical lines appear on the hi-res screen when you first run it, press BREAK and type RUN.

If you really get stuck during your adventure and cannot get any further, send us a note explaining your problem, with a stamped addressed envelope for the reply, and we will give you some help.
