Your name is John Franks and you are a professor of physics at the University of London. The year is 1995 and you are currently studying the possibilities of matter transference. The theory seems OK but, try as you might, you have not been able to complete the experiment. However, you were talking to a visiting professor last night, and he suggested that a quite small adjustment to the wiring might be the answer. you retire to your private research laboratory in your basement to make the necessary adjustments to the circuits.

This text adventure game understands all the standard adventure commands i.e. North, East, South, West, Up and Down which can be abbreviated to N, S, E, W, U, D. Some useful verbs are EXAMINE, LOOK, GET, DROP, GIVE, UNLOCK and many more. Other important commands are INVENTORY or (I) will give you a list of what you are carrying, SAVE will save the game position to tape and LOAD will restore a previously saved position from tape. RAMSAVE (RS) will save the game position to memory and RAMLOAD (RL) will restore a position from memory.
