March 1987

NEWSLETTER

Just in case we did not catch everybody in our upgrade letter, we have Level J of LS-DOS 6.3 available now. LSI have a rather unusual update system, in Levels, with adjacent Levels the same in content but not method of manufacture. All you need know is that, in content, Levels I and J are the same so the upgrade is only of interest to Level H owners. If we missed anyone please give us a ring.

Talking about things being unusual, the accompanying Sale sheet is not too normal! The problem was that I did not know what to call it. The obvious is "Clearance Sale" but the last time we did that we got endless calls asking why we were going out of business! After considerable thought, I decided that we would have a "Blank" Sale !

Seriously, I would like to make the position very clear. It is no secret that the Tandy 8 bit market is no longer viable. We continue more as a matter of sentiment than anything, plus we promised that we would support the machines for at least a couple of years more. So the main point to make is that we will be continuing to sell Tandy 8 bit software, as per the Catalogue, until further notice, which to the best of my knowledge means at least two more years.

We have always been a "soft sell" company and do not bang the drum too much; nonetheless we are of fair size and have, over the years, accumulated a large amount of surplus material. It is for this reason - and not one of impending doom - that we are having this software, hardware and odds 'n ends Sale.

The items in this Sale are strictly "as is". Everything on sale is working now, the computers are operating and the software is normal stock but we make no guarantees of any sort. At these prices you are strictly on your own! So far as the hardware is concerned, we would much prefer that you pick it up from Bexhill. This enables you to see it working and in some cases select which particular specimen you want. If this is not practicable then we will ship Securicor but the buyer will be responsible from the time that we get a pick up signature from Securicor and a shipping charge prepayment of £15 must be added to the goods price, any adjustments to be made later. So far as the software is concerned, it is as I have said normal stock but we cannot support it and will refuse support calls.

Obviously the Sale is subject to prior sale. We will substitute software unless otherwise instructed. Credit cards will be accepted in the normal way. Orders of under £5 will not be accepted. Please allow a few days extra over our normal shipping time to you. Previous Sales are off but the 20% sale on the regular catalogue programs, remains effective.

A.J.Harding

S A L E !

S O F T W A R E

Miscellaneous (all with full binder documentation):

Model II Profile Plus (26-5415)	20.00
Model II Scripsit (26-4530)	20.00
Model II Basic Compiler (26-4705)	20.00
Model II Cobol Compiler (26-4703)	20.00
Model II Editor/Assembler (26-4702)	20.00
