ENLIGHTENMENT

Quick Start Card

Enlightenment runs on:
- Amiga 500
- Amiga 1000
- Amiga 2000

- Commodore 64
- Commodore 128

With:
- 512K memory
- Joystick required

- 64K required
- Joystick required

Optional:
- 1 Meg RAM

Getting Started:
Here's all you need to start playing Enlightenment right away. Please refer to the manual for more details.

On an Amiga 500 or 2000
- Turn on your computer. Insert your Enlightenment disk when you see the Workbench prompt. The game will now load.

On an Amiga 1000
- Turn on your computer. Insert your Kickstart 1.2 or higher when you are prompted. When you see the Workbench prompt, remove your Kickstart disk and insert your Enlightenment disk.

Note
- Enlightenment is only compatible with Operating Systems 1.2 and above.
- If you have 1 megabyte of memory in your Amiga then your Enlightenment disk will automatically detect this and load a special version of the game that does not need to access the disk drive as often, thus speeding up gameplay.

On a Commodore 64 or 128
- Type **LOAD "*",8,1**. A menu will appear after a short time. Select the option that you require with the **CRSR** keys and press **SPACE** to confirm that option.

Command Keys:

	Amiga	Commodore 64
Spell Selection	Numeric Keypad 1,2,3,4,6,7,8,9	P, @, *, up arrow, L, :, ;, =
