## Mission Asteroid

A terrible tragedy is about to happen...An asteroid of incredible size is headed for a direct collision with the Earth. The predicted impact could destroy all life here — unless something is done quickly.

As an astronaut, it's your duty to rocket to the asteroid and attempt to alter its course. There's no time to lose! If you don't execute your mission correctly and travel quickly enough, there will be **DISASTER!**

The asteroid will collide with Earth at a pre-determined time. You are wearing a watch, which, if checked periodically, will let you know how much time you have left.

If you're quick and careful, you will save us all from oblivion. If not, don't bother landing on Earth again, you'll have no home to return to. Good luck!
