♦ KEYBOARD CONTROLS

Keyboard Controls are the same as the menu with the exception of Strategy Mode Control.

- To switch from Manual to Automatic or vice versa: press the F1 key.
- To switch to the AI panel: press the space bar.
- To exit the AI panel: press "ESC".

♦ COMBAT HINTS

- The Reversal spell is not effective in close combat. Aura, Resistance, and Protection do help.
- Clicking on a spell icon does nothing. You have to hold down the mouse button at least one second, then release. The longer you hold it down, the stronger the spell.
- When you defend or do nothing, you slowly recover stamina. You
 cannot attack when your Stamina drops to zero; you can only
 defend or run away until you recover Stamina.
