ACTION GAMES

CANNONBALL BLITZ

Cannonball Castle, fortress of the enemy redcoats, sits high atop Nutcracker Hill. Your mission as a rebel soldier is to climb Nutcracker Hill and destroy the castle. Rough terrain, enemy troops, and a barrage of cannonballs may keep you from completing your mission.

A revolutionary new game by Olaf Lubeck.

48K APPLE II/II+ DOS 3.2 or 3.3

PRICE \$34.95

CROSSFIRE

They've landed and are taking over the city. Steadily they're making their way across town, destroying everything in their paths. The town has been evacuated and your regiment has retreated leaving you alone in the city, at the mercy of the aliens. If you're going to live, you'll have to concentrate on where the shots are coming from and where you're going, because if you don't, you'll get caught in the CROSS FIRE.

PRICE \$34.95

MARAUDER

Others have promised it - but only ON-LINE SYSTEMS can deliver the ultimate in extraterrestrial invasion. In MARAUDER, you move through a barrage of lasers and bombs trying to land your ship on an alien planet. Once you land, the adventure really begins. Can you make your way through the vast corridors of the alien citadel to victory? Keyboard controlled.

48K APPLE II/II+ DOS 3.2 or 3.3

PRICE \$34.95

MISSILE DEFENSE

In this arcade quality action game you command the nations missile defense center to protect The United States against a foreign missile attack. As missiles drop from the sky, you must shoot them while trying to protect your six cities and three missile bases. An automatically escalated skill level insures that the better you get, the tougher MISSILE DEFENSE gets! Paddle, joystick or keyboard controlled.

48K APPLE II/II+ DOS 3.2 or 3.3

PRICE \$29.95

PEGASUS II

You are the pilot of the fighter PEGASUS II. Your mission: attack and destroy the enemy Gebellians. If you fail to destroy them completely, they will rise and take over your alliance of thirty worlds, making the universe unsafe for adventurers anywhere. PEGASUS II comes with utilities for you to define your own playing terrain. Paddle or joystick controlled.

48K APPLE II/II+ DOS 3.2 or 3.3

PRICE 29.95

SABOTAGE

In this innovative game, you take command of a powerful gun base to shoot helicopters and aircraft out of the air. Beware! The opposing forces have plans to SABOTAGE your base. Can you defend yourself from the rain of bombs and paratroopers and keep your base in action? Paddle or keyboard controlled.

48K APPLE II/II+ DOS 3.2 or 3.3

PRICE \$24.95

THRESHOLD

THRESHOLD is an arcade game with alien attackers galore. There are more monsters out there, in fact, than we expect that you'll ever even see. THRESHOLD was designed to be an arcade game that you won't get bored with, and that means a constantly changing game with a graduated skill level. More than that, THRESHOLD means constant fun. Paddle or joystick controlled.

TIME ZONE

HI-RES #5

TIME ZONE is the end result of the most intense project that ON-LINE SYSTEMS has ever embarked on. TIME ZONE is a multiple disk (six disks both sides) HI-RES Adventure game that is unmatched by any other adventure on any computer. TIME ZONE takes you back to the time when dinosaurs walked the Earth and lets you meet the likes of BEN FRANKLIN, CAESER, and ROBIN HOOD. TIME ZONE shows you the future where something is very, very wrong. If you have the courage, TIME ZONE will put you in a position to stop a war that could mean the end of the Earth; a war that takes place thousands of years in the future. TIME ZONE means the very best in HI-RES Adventuring by the APPLE's number one selling authoress ROBERTA WILLIAMS. This game should take over a year to play.

TIME ZONE is for the skilled adventurer only.

48K APPLE II/II+ DOS 3.3

BUSINESS

The DICTIONARY

There are many spelling verification packages on the market, but none offer all the power of The DICTIONARY. The DICTIONARY not only checks the spelling in your document, but helps you correct mistakes that are found by offering you different spellings of a word. This special "word search" feature lets you proof your spelling without ever opening an "old-fashioned" dictionary. The DICTIONARY supports over 25,000 words with over 5,000 more for you to define. Check out The DICTIONARY and find out how it can help make your word processing error free.

48K APPLE II/II+ DOS 3.3

PRICE \$99.95

The GENERAL MANAGER

Now you have the power of a mainframe available for your APPLE. The GENERAL MANAGER is a data base system designed after large mainframe data base systems with one large difference, you don't have to be a programmer to understand and use it. The GENERAL MANAGER is the user friendliest, easiest accessed, most powerful data base management program available for the APPLE II/II+. The GENERAL MANAGER allows you to design and maintain your own data base quickly and easily. The GENERAL MANAGER is designed to allow you to use your data base with any word processor, mailing list data base or accounting package that uses standard DOS. Get The GENERAL MANAGER and see how productive you can make yourself and your APPLE.

48K APPLE II/II+ DOS 3.3

PRICE \$149.95

SCREENWRITER II

SCREENWRITER II is an easy to use totally software based complete word processor for the APPLE II/II+. No need to buy expensive hardware to get the features that SCREENWRITER II offers, such as true upper and lower case, seventy columns on the screen, and a keyboard buffer. SCREENWRITER II does all that at no additional cost to you. SCREENWRITER II also does boldfacing, underlining, macros, global search and replace, form letters, support of multiple disk drives, automatic generation of up to four separate indices, and much more. SCREENWRITER II is supported by the DICTIONARY and The GENERAL MANAGER. Together they make a complete business system for your home or office.

48K APPLE II/II+ DOS 3.3

PRICE \$129.95

UTILITIES

THE ARTIST

THE ARTIST is a complete graphics and animation package for the APPLE II/II+. Designed by Ken Williams and Warren Schwader, this package includes many routines used in ON-LINE games such as THRESHOLD, CROSSFIRE, MOUSKATTACK, and our HI-RES Adventure series. Also included is a character set editor, a zoom lens (for pinpoint accuracy in HI-RES graphics), 21 color fast fill routines, a shape table maker, quick byte move routines, and full complete documentation. This package can be used to make beautiful HI-RES graphic pictures and quick, colorful arcade games. Take a look at THE ARTIST and see what it can do for you.

48K APPLE II/II+ DOS 3.3

PRICE \$79.95

EPF IV

EPF IV (Extended programming facility) is a program development and data management utility which brings mainframe programming features to the APPLE II. The data management function allows you to perform file requests by single key entries to an alphabetized catalog display. The APPLESOFT basic editor operates as a full screen editor. Forget the line numbering. With single key entries you may move quickly through your program text. In addition to all the standard edit features, EPF IV gives you auto-renumber, find/change, block move, copy and delete, cross references of variables and line numbers and edit-time label basic.

48K APPLE II/II+ DOS 3.2 or 3.3

PRICE \$79.95

EXPEDITER II+

Provides an easy means by which Applesoft BASIC programs written for the APPLE II/II+ computer may be translated into machine language. As a result, the compiled version of the program will normally execute two to twenty times faster. All features of Applesoft are fully supported including the use of HI-RES graphics, shape tables, LO-RES graphics, defined functions and DOS commands. Debugging of compiled code is aided through use of such tools as TRACE capabilities and complete symbol table listings. Extensive use is made of pre-existing routines within the Applesoft ROM. A special "MEMORY COMPRESSION" feature minimizes the memory required by compiled machine code. There is no additional syntax to learn and most compilations can be performed with one simple command.

48K APPLE II/II+ APPLESOFT in ROM DOS 3.2 or 3.3

PRICE \$134.95

LISA 2.5

ASSEMBLY LANGUAGE DEVELOPMENT SYSTEM FOR APPLE COMPUTERS

LISA 2.5 is a proven method for 6502 Assembly language development that has been in use in the homes and offices of both novice and professional programmers for over two and a half years. LISA 2.5 is by far the most popular assembler ever developed for the APPLE and is endorsed by masters of the field such as Steve Wozniak, Jay Sullivan, Ken Williams, Olaf Lubbeck, Mark Pelczarski and Randy Hyde.

LISA 2.5 is complete and easy to use. The commands for programming procedures are easy to learn and the assembly is quick (20,000 lines a minute). The LISA 2.5 assembler uses over 30 pseudo opcodes (which turn your APPLE II into a 16 bit machine, requiring less code to perform a desired task); more extended mnemonics (a greater memory aid) and more commands which allow the flexible use of DOS. LISA 2.5 will support your 16K extension board if it is present.

48K APPLE II/II+ DOS 3.2 or 3.3

PRICE \$79.95

PRC 000

UTILITIES

LISA EDUCATIONAL PAK

This system is all the BASIC programmer needs to learn how to write fast, error free, 6502 assembly language programs. This package includes LISA 2.5 Assembler, SPEED/ASM assembly language subroutine package, and the bestselling book USING 6502 ASSEMBLY LANGUAGE. If these items were purchased separately they would retail at a total of almost one hundred and forty dollars.

48K APPLE II/II+ DOS 3.2 or 3.3

PRICE \$119.95

MMS II

MMS II is a new utility that relocates APPLE's disk operating system (DOS) onto your 16K memory expansion board. Once DOS is relocated, the memory, an additional 10,700 bytes, becomes available for your use (Imagine! A 75K APPLE). DOS is still active but it no longer takes up precious memory. Now you can use that extra memory to run or develop larger APPLESOFT or machine language programs, store more information in memory, or create larger arrays. MMS II also works great with EXPEDITER II+ to help compensate for any memory you might lose after compiling.

MMS II is designed to become the boot "hello" program on your DOS 3.2 or 3.3 work disk (MMS II is not copy protected) and works with all currently available 16K expansion boards. Under normal circumstances, MMS II is completely transparent to you and your programs.

48K APPLE II/II+ DOS 3.2 or 3.3

PRICE \$49.95

THE NEXT STEP

Imagine being able to print the letter "A" and get a multi-color space ship. Using THE NEXT STEP and a minimum of programming effort, you can do it in no time at all. THE NEXT STEP is a user friendly graphics tool kit that allows you to create new character sets or redefine characters to make shapes for use with your BASIC or machine language programs. THE NEXT STEP is perfect for use on shapes for animation and features a joystick controlled color menu to make your graphics come alive. THE NEXT STEP even generates its own code to help you incorporate new characters and shapes into your programs. THE NEXT STEP is the easy way to create shapes for use in character set or player missile graphics. THE NEXT STEP helps you mix any of the ATARI's 14 graphics modes in the same display. THE NEXT STEP is the perfect graphics utility for the BASIC and machine language programmer - novice and professional alike.

32K ATARI 400/800

PRICE \$39.95

SPEED/ASM

Imagine being able to simulate common basic Statements and execute them this easy

BASIC:

```
10 FOR I = 1 to 10
20 PRINT I
30 NEXT I
```

SPEED/ASM:

```
JSR FOR
ADR I, 1, 10
JSR PRINT
ADR I
JSR NEXT
```

SPEED/ASM is a powerful new assembly language development tool that gives the BASIC programmer power to build complex assembly language programs. SPEED/ASM is a set of subroutines used to simulate BASIC, in developing an Assembly language program. Thirty-nine pages of well-written, informative documentation explain how you can use SPEED/ASM (and your knowledge of BASIC) to make programs of professional quality, quickly and easily. SPEED/ASM is an independent Assembly language subroutine package. Due to this, SPEED/ASM Programs produced on an APPLE Computer would be compatible with ATARI SPEED/ASM and vice-versa. Also, it is not necessary to own a "LISA" assembler in order to operate SPEED/ASM.
