

# Wait!

---

Don't follow the installation instructions on the back of this package. They were written by an alien in an obvious attempt to fool you, our loyal customers. (Actually, we just included a file to update your game. As a result, we had to change some stuff around.) Follow the directions below instead.

To install the speech pack *after* installing the game:

1. Insert DISK 1 of the speech pack into your drive.
2. Log on to that drive (usually A: or B:)
3. Type INSTALL, and press enter.
4. Using the arrow keys, move to the installation selections and select "Speech Pack" by pressing ENTER or the Spacebar when it's highlighted. You'll see a check mark next to it. Deselect all the other options in the game way.
5. Select Start Installation. Star Trail will ask for disks as needed.

No sense leaving this side blank. Might as well use it for something.
