Thank you for purchasing the Quality Wizardry Map Set from A-Maze-Ment Grafix. These maps were generated on an Apple II+ computer using the Alpha Plot graphics program from Beagle Bros. Micro Software. Grid assignments and locations were verified by other game players whenever possible.

Over 1000 hours of game playing and research went into the production of this mapping aid. Most of the mapping was obtained by playing each scenario level by level. A few places in the maze could only be mapped by teleporting to each individual square.

Every effort has been made to ensure that these maps contain the most accurate representation of each level in the maze. If you find any discrepancies between the actual game and our maps please contact us so that we can verify your findings or make any corrections to our version of the level.

Scenario Map Legend

	Wall
	Door
	One-way door
	Hidden door
	Hidden one-way door
	Illusion wall

Maps drawn by Jerry Hewett
