# Oliver's Twist

By Mickey Schmitt & Lynn Gardner

## INTRODUCTION:

At the end of your long journey from your home village you are standing in front of the castle of your recently departed Uncle Oliver (known in this realm as King Oliver IV). As one of the family's poorest relations, no one was more surprised than you on finding that Oliver had left his entire kingdom to you. However, as with many unexpected gifts there is a catch. Before you can inherit the castle you have to mollify the spirits of your ancestors by returning 15 treasures to their rightful places. Unfortunately, the will does not specify where these locations might be. Can you return everything without disturbing Oliver's ghost?

Welcome to a completely new adventure for the Adventure Command Module by Texas Instruments Inc. for the TI-99/4A. The Adventure module is potentially a whole new world inside of your computer - one for you to spend hours in exploring and enjoying. We hope you will enjoy this "twisted" adventure, as well as the ones to come in the years ahead.

## LOADING OLIVER'S TWIST:

**Oliver's Twist** is available on both disk and cassette so all Adventure fans can play this game. To load the game refer to the instructions on pages 3, 4 and 10 of the Adventure Module manual for a thorough discussion of loading a game from disk or cassette.

## PLAYING THE GAME:

You are now ready to start the adventure. If you have played other adventures for the Adventure module, you are probably familiar with the pattern of such games - you have to find certain objects to arrive at some destination. This adventure is subtly different - the objects are all known, but you have to figure out where

they go. Remember this as you play the game as it means you will have to do things somewhat differently. You will frequently have to use your surroundings or the things in a room as a clue to where the treasures belong.

Other than that, **Oliver's Twist** recognizes many of the common commands used in games for the Adventure module. For a detailed description of these commands, read pages 5 through 8 of the Adventure module manual.

## OTHER ADVENTURE GAMES:

This is the first game for the Adventure module by Mickey Schmitt and Lynn Gardner - it is not likely their last. This adventure was produced with the aid of the Adventure Editor, which is available from many TI dealers and distributors. The Adventure Editor is a program that gives you access to the "language" that all adventures for the Adventure module are written in. If you are interested in writing your own adventure, or would just like to understand how adventures are written, you may want to purchase the book **The Adventure Editor Tutorial**, by Mickey Schmitt, and published by Asgard Software.

Asgard Software has a complete line of other adventure games as well - including a series of games for use with the Tunnels of Doom module by Texas Instruments Inc., an editor for creating Tunnels of Doom games by John Behnke, and a stand-alone series of highly rated animated graphics adventures called Legends, by Donn Granros and Ed Johnson. Contact Asgard Software at the address below for more information about these products, and the more than 50 other programs available.

## DISCLAIMER:

Asgard Software, the sole manufacturer and distributor of this program, hereafter referred to as the "product", does not guarantee that this product will be free from error, perform as stated in this manual or elsewhere, or meet the needs or expectations of the user.

Asgard Software is not liable for the use or misuse of this product or any damage that may result from the normal use of this program, improper or proper use of this product, or information contained within this manual - not limited to the proscribed or actual function of the program. Asgard Software warrants the part of the product consisting of the recording media for a period not to exceed 90 days from the purchase, provided that the recording media is not damaged from improper use, accident, intentional actions, or any condition not arising from the quality of the original material or workmanship. Asgard Software reserves the right to refuse to service any returned materials that do not meet this qualification.

Asgard Software will service free of charge any product returned within 90 days that meets the conditions described above. After 90 days and up until the life of the product (or company), products which meet the above conditions may be replaced for the cost of return postage to the user.

This product is provided unprotected so that users can legally create copies for their own use. This is not a license to distribute this product. This product is copyrighted in the manner described in the manual, and may not be reproduced by any means for the use of others. In transferring ownership of this product to another, all personal copies must likewise be transferred or destroyed. Ownership of this product carries the responsibility to control its use and distribution of personal copies - and users who do not do so are liable for any damages incurred to Asgard Software due to loss of sales.
